CURRENT SERIAL RECORDS

U. S. EXPORTS OF BEEF BREEDING CATTLE

CALENDAR YEAR 1964

U. S. exports of beef breeding cattle in 1964 totaled 14,523 head, highest since 1959 and an increase of over 13 percent over 1963 levels. The 1964 increase was caused primarily by the substantial increases in exports to Mexico and Canada. Moderate increases were shown for exports to Guatemala, Nicaragua, Ecuador, El Salvador and the Republic of South Africa. The 1964 increases were partially offset by a rather substantial decrease in exports to Venezuela. Mexico remained the leading export market for U. S. beef breeding cattle in 1964, taking 5,974 head or 41 percent of total U. S. beef cattle exported. Canada ranked second with 3,626 head, or 25 percent of total shipments, and Venezuela third with 1,817, or 13 percent of the total. During 1964, U. S. breeding cattle were shipped to 28 foreign countries.

The outlook for exports during 1965 is very good with several countries already buying substantial numbers in the first two months of this year. A number of countries still have funds from loans of the Export-Import Bank, the Inter-American Development Bank, and other international loan agencies to expend within this year. These will tend to boost U. S. exports of beef breeding cattle, as in recent years.

During 1964, Hereford was the most important beef breed exported with a total of 4,841 head, slightly above the 1963 total of 4,527 and well

over the 4,118 head exported during 1962. The American Brahman ranked second in exports with 4,685 head during 1964. This represented a slight decrease as compared with the 4,722 head exported in 1963. The Angus beef breed ranked third with a total of 1,951 head, a substantial gain over the 1,286 head exported in 1963. Charolais ranked fourth for the first time in 1964 with 1,020 head, a substantial gain over the 1963 total of 361 head. Santa Gertrudis moved down to fifth place with 1,008 head, which represented a decrease from the 1,248 head exported in 1963. Brangus exports in 1964 were also up to 425 head as compared with 350 head during 1963.

Hereford cattle, the leading U. S. beef export breed for 1964, were exported to only seven foreign countries with Canada and Mexico taking about 99 percent of the total exports. However, Hereford cattle went also to Japan, Okinawa, Republic of South Africa, Thailand, and Ecuador during 1964. American Brahman cattle were shipped to eighteen foreign countries during 1964 with Venezuela the largest single purchaser buying 1,736 head, or 37 percent of total Brahman exports. Mexico ranked second, taking 986 head or 21 percent. Worth noting are increased exports to the Republic of South Africa. In 1964 exports of Brahman totaled 269 head as compared with only 149 head in 1963, and 113 head in 1962. South Africa's producers have shown significant interest in buying American Brahman cattle in the past two years. Charolais breeding cattle were exported to 11 foreign countries in 1964, reaching a total of 1,020 head with the largest outlet Mexico with 520 head, or about 50 percent of the total exports. Canada ranked second as an export outlet with 353 head during the same period. The American-International Charolais Association has only recently begun work on locating export outlets for its members' registered animals and last year was the first time that they have exported substantial numbers.

Texas was the leading export state by a wide margin, exporting 7,146 head, or 49 percent of the total beef breeding cattle during 1964. Florida ranked second as our export state with 1,763 head, or 12 percent of the total. Arizona ranked third with 811 head, or 6 percent of the total. A total of 40 states contributed to export of beef breeding cattle from the United States during 1964.
